

How RelyMD Helps Employers

24/7 on-demand doctor visits,
no appointment necessary.

RelyMD is an online urgent care service that reduces healthcare spend, better engages employees, and provides innovative benefits that provide convenient – anytime, anywhere – access to reliable trusted medical care. Our on-demand telehealth services reduce employee healthcare spend. This instant support gives patients the care they need to avoid expensive ER and urgent care visits when appropriate.

"Telemedicine could potentially deliver more than \$6 billion a year in health care savings to US companies..."
-Towers Watson

3 Ways Telehealth Benefits **Your Company**

- 1** Lowers your company's health care costs by providing your employees a low-cost option for high-quality medical treatment. RelyMD's program can save your company out-of-pocket healthcare costs and help mitigate the rising cost of health insurance premiums that you pay each year.
- 2** Increases your workforce productivity by reducing employees' time away from work. With RelyMD, when your employees get sick, they no longer have to waste time coordinating schedules, making appointments, then travelling to the doctor's office (time that is often absorbed by you, the employer, with late arrivals, early departures, or long lunches). If one of your employees doesn't feel well, he or she has instant access to a RelyMD doctor via his or her computer, smart phone, or tablet. RelyMD is also available to all eligible dependents, so we can help reduce missed days of work by parents who would otherwise be taking their child to an appointment.

- 3** Provides early diagnoses of potentially serious medical problems for your employees to avoid costly hospitalizations. There are times with RelyMD, just like in the hospital, when a patient may not require emergency care, but a followup appointment with the appropriate specialist is needed. For busy employees who have a lingering ailment that may be serious, but have delayed seeing a doctor due to busy schedules, RelyMD is a perfect solution. When one of your employees needs follow-on treatment, we can expedite the process, ensuring that your employees are proactively receiving the medical care they need. As an employer, this saves you money, as more serious illnesses and injuries are diagnosed and treated sooner, avoiding costly hospitalizations for ailments left untreated.
